

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '60' is written above the line, and '30' is written below the line at both ends. A bracket spans the entire length of the line, and another bracket spans from the middle tick mark to the right end.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '80' is written above the line, and '2' is written below the line at the middle tick mark. A bracket spans the entire length of the line.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '100' is written above the line, and '2' is written below the line at the middle tick mark. A bracket spans the entire length of the line.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '100' is written above the line, and '2' is written below the line at the middle tick mark. A bracket spans the entire length of the line.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '60' is written above the line, and '2' is written below the line at the middle tick mark. A bracket spans the entire length of the line.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '20' is written above the line, and '2' is written below the line at the middle tick mark. A bracket spans the entire length of the line.

$$60 : 2 = 30$$

$$80 : 2 =$$

$$100 : 2 =$$

$$60 : 2 =$$

$$100 : 2 =$$

$$20 : 2 =$$

$$60 : 2 = 30$$

$$80 : 2 =$$

$$20 : 2 =$$

$$100 : 2 =$$

$$60 : 2 =$$

$$100 : 2 =$$

$$60 : 2 = 30$$

$$100 : 2 =$$

$$20 : 2 =$$

$$80 : 2 =$$

$$100 : 2 =$$

$$60 : 2 =$$

$$60 : 2 = 30$$

$$100 : 2 =$$

$$100 : 2 =$$

$$20 : 2 =$$

$$60 : 2 =$$

$$80 : 2 =$$

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the line, and the number 30 is written below the line at both ends. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 20 is written above the line, and the number 2 is written below the line at both ends. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the line, and the number 2 is written below the line at both ends. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 80 is written above the line, and the number 2 is written below the line at both ends. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the line, and the number 2 is written below the line at both ends. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the line, and the number 2 is written below the line at both ends. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 60 is written above the center tick mark. The number 30 is written below each of the two ends of the line, with vertical lines connecting the ends to the 30s. A horizontal line with a vertical tick mark in the center is drawn above the number line, spanning the distance between the two 30s.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 20 is written above the center tick mark. A horizontal line with a vertical tick mark in the center is drawn above the number line, spanning the distance from the center tick mark to the right end of the line.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 60 is written above the center tick mark. A horizontal line with a vertical tick mark in the center is drawn above the number line, spanning the distance from the center tick mark to the right end of the line.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 80 is written above the center tick mark. A horizontal line with a vertical tick mark in the center is drawn above the number line, spanning the distance from the center tick mark to the right end of the line.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 100 is written above the center tick mark. A horizontal line with a vertical tick mark in the center is drawn above the number line, spanning the distance from the center tick mark to the right end of the line.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 100 is written above the center tick mark. A horizontal line with a vertical tick mark in the center is drawn above the number line, spanning the distance from the center tick mark to the right end of the line.

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the tick mark. The number 30 is written below the line at the left and right ends, with vertical lines connecting them to the ends of the horizontal line.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the tick mark. The number 2 is written below the line at the left and right ends, with vertical lines connecting them to the ends of the horizontal line.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 80 is written above the tick mark. The number 2 is written below the line at the left and right ends, with vertical lines connecting them to the ends of the horizontal line.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 20 is written above the tick mark. The number 2 is written below the line at the left and right ends, with vertical lines connecting them to the ends of the horizontal line.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the tick mark. The number 2 is written below the line at the left and right ends, with vertical lines connecting them to the ends of the horizontal line.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the tick mark. The number 2 is written below the line at the left and right ends, with vertical lines connecting them to the ends of the horizontal line.

$$60 : 2 = 30$$

$$80 : 2 =$$

$$100 : 2 =$$

$$100 : 2 =$$

$$20 : 2 =$$

$$60 : 2 =$$

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the line, and the number 30 is written below the line at both ends. A bracket spans the entire length of the line, and another bracket spans from the middle tick mark to the right end.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. A bracket spans the entire length of the line, and another bracket spans from the middle tick mark to the right end.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. A bracket spans the entire length of the line, and another bracket spans from the middle tick mark to the right end.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. A bracket spans the entire length of the line, and another bracket spans from the middle tick mark to the right end.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. A bracket spans the entire length of the line, and another bracket spans from the middle tick mark to the right end.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. A bracket spans the entire length of the line, and another bracket spans from the middle tick mark to the right end.

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 60 is written above the center tick mark. The number 30 is written below each of the two ends of the line, with vertical lines connecting them to the ends of the horizontal line.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 20 is written above the center tick mark. There are vertical lines at both ends of the horizontal line, but no numbers are written below them.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 60 is written above the center tick mark. There are vertical lines at both ends of the horizontal line, but no numbers are written below them.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 100 is written above the center tick mark. There are vertical lines at both ends of the horizontal line, but no numbers are written below them.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 100 is written above the center tick mark. There are vertical lines at both ends of the horizontal line, but no numbers are written below them.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 80 is written above the center tick mark. There are vertical lines at both ends of the horizontal line, but no numbers are written below them.

$$60 : 2 = 30$$

$$80 : 2 =$$

$$60 : 2 =$$

$$100 : 2 =$$

$$20 : 2 =$$

$$100 : 2 =$$

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 60 is written above the center tick mark. The number 30 is written below the left end of the line, and another 30 is written below the right end. A horizontal bracket spans the entire length of the line, with vertical lines connecting it to the 30s at each end.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 20 is written above the center tick mark. A horizontal bracket spans the entire length of the line, with vertical lines connecting it to the center tick mark and the right end of the line.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 80 is written above the center tick mark. A horizontal bracket spans the entire length of the line, with vertical lines connecting it to the center tick mark and the right end of the line.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 100 is written above the center tick mark. A horizontal bracket spans the entire length of the line, with vertical lines connecting it to the center tick mark and the right end of the line.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 60 is written above the center tick mark. A horizontal bracket spans the entire length of the line, with vertical lines connecting it to the center tick mark and the right end of the line.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 100 is written above the center tick mark. A horizontal bracket spans the entire length of the line, with vertical lines connecting it to the center tick mark and the right end of the line.

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '60' is written above the line, and '30' is written below the line at both ends. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '80' is written above the line, and '2' is written below the line. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '60' is written above the line, and '2' is written below the line. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '100' is written above the line, and '2' is written below the line. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '100' is written above the line, and '2' is written below the line. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '20' is written above the line, and '2' is written below the line. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the line, and the number 30 is written below the line at both ends. A horizontal bracket spans the entire length of the line, and a vertical line segment connects the middle tick mark to the top of the bracket.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 20 is written above the line, and the number 2 is written below the line at the middle tick mark. A horizontal bracket spans the entire length of the line, and a vertical line segment connects the middle tick mark to the top of the bracket.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the line, and the number 2 is written below the line at the middle tick mark. A horizontal bracket spans the entire length of the line, and a vertical line segment connects the middle tick mark to the top of the bracket.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 80 is written above the line, and the number 2 is written below the line at the middle tick mark. A horizontal bracket spans the entire length of the line, and a vertical line segment connects the middle tick mark to the top of the bracket.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the line, and the number 2 is written below the line at the middle tick mark. A horizontal bracket spans the entire length of the line, and a vertical line segment connects the middle tick mark to the top of the bracket.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the line, and the number 2 is written below the line at the middle tick mark. A horizontal bracket spans the entire length of the line, and a vertical line segment connects the middle tick mark to the top of the bracket.

$$60 : 2 = 30$$

A number line diagram showing 60 divided into two equal parts of 30 each. A vertical tick mark is at 60, and two vertical tick marks are at 30, with a horizontal line connecting them and a vertical line from the center to 60.

$$80 : 2 =$$

A number line diagram showing 80 divided into two equal parts. A vertical tick mark is at 80, and two vertical tick marks are at 40, with a horizontal line connecting them and a vertical line from the center to 80.

$$60 : 2 =$$

A number line diagram showing 60 divided into two equal parts. A vertical tick mark is at 60, and two vertical tick marks are at 30, with a horizontal line connecting them and a vertical line from the center to 60.

$$100 : 2 =$$

A number line diagram showing 100 divided into two equal parts. A vertical tick mark is at 100, and two vertical tick marks are at 50, with a horizontal line connecting them and a vertical line from the center to 100.

$$100 : 2 =$$

A number line diagram showing 100 divided into two equal parts. A vertical tick mark is at 100, and two vertical tick marks are at 50, with a horizontal line connecting them and a vertical line from the center to 100.

$$20 : 2 =$$

A number line diagram showing 20 divided into two equal parts. A vertical tick mark is at 20, and two vertical tick marks are at 10, with a horizontal line connecting them and a vertical line from the center to 20.

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '60' is written above the line, and '30' is written below the line at both ends. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '100' is written above the line, and '2' is written below the line. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '60' is written above the line, and '2' is written below the line. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '20' is written above the line, and '2' is written below the line. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '100' is written above the line, and '2' is written below the line. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '80' is written above the line, and '2' is written below the line. A horizontal bracket spans the entire length of the line, with a vertical tick mark in the center.

$$60 : 2 = 30$$

$$80 : 2 =$$

$$100 : 2 =$$

$$100 : 2 =$$

$$20 : 2 =$$

$$60 : 2 =$$

$$60 : 2 = 30$$

$$80 : 2 =$$

$$100 : 2 =$$

$$100 : 2 =$$

$$20 : 2 =$$

$$60 : 2 =$$

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the tick mark, and the number 30 is written below the line at both ends. A horizontal bracket spans the entire length of the line, with a vertical line connecting the center of the bracket to the 60 tick mark.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the tick mark, and the number 2 is written below the line at both ends. A horizontal bracket spans the entire length of the line, with a vertical line connecting the center of the bracket to the 100 tick mark.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the tick mark, and the number 2 is written below the line at both ends. A horizontal bracket spans the entire length of the line, with a vertical line connecting the center of the bracket to the 60 tick mark.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 80 is written above the tick mark, and the number 2 is written below the line at both ends. A horizontal bracket spans the entire length of the line, with a vertical line connecting the center of the bracket to the 80 tick mark.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the tick mark, and the number 2 is written below the line at both ends. A horizontal bracket spans the entire length of the line, with a vertical line connecting the center of the bracket to the 100 tick mark.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 20 is written above the tick mark, and the number 2 is written below the line at both ends. A horizontal bracket spans the entire length of the line, with a vertical line connecting the center of the bracket to the 20 tick mark.

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '60' is written above the line, and '30' is written below the line at both ends. A horizontal bracket spans the entire length of the line, with a vertical tick mark at the center.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '80' is written above the line, and '2' is written below the line at the center. A horizontal bracket spans the entire length of the line, with vertical tick marks at both ends.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '60' is written above the line, and '2' is written below the line at the center. A horizontal bracket spans the entire length of the line, with vertical tick marks at both ends.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '100' is written above the line, and '2' is written below the line at the center. A horizontal bracket spans the entire length of the line, with vertical tick marks at both ends.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '100' is written above the line, and '2' is written below the line at the center. A horizontal bracket spans the entire length of the line, with vertical tick marks at both ends.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '20' is written above the line, and '2' is written below the line at the center. A horizontal bracket spans the entire length of the line, with vertical tick marks at both ends.

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the line, and the number 30 is written below the line at both ends. A horizontal bracket spans the entire length of the line, and a vertical line segment connects the middle tick mark to the top of the bracket.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 20 is written above the line, and the number 2 is written below the line at the middle tick mark. A horizontal bracket spans the entire length of the line, and a vertical line segment connects the middle tick mark to the top of the bracket.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the line, and the number 2 is written below the line at the middle tick mark. A horizontal bracket spans the entire length of the line, and a vertical line segment connects the middle tick mark to the top of the bracket.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 80 is written above the line, and the number 2 is written below the line at the middle tick mark. A horizontal bracket spans the entire length of the line, and a vertical line segment connects the middle tick mark to the top of the bracket.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the line, and the number 2 is written below the line at the middle tick mark. A horizontal bracket spans the entire length of the line, and a vertical line segment connects the middle tick mark to the top of the bracket.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the line, and the number 2 is written below the line at the middle tick mark. A horizontal bracket spans the entire length of the line, and a vertical line segment connects the middle tick mark to the top of the bracket.

$$60 : 2 = 30$$

$$80 : 2 =$$

$$20 : 2 =$$

$$100 : 2 =$$

$$100 : 2 =$$

$$60 : 2 =$$

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 60 is written above the tick mark. The number 30 is written below the line at the left and right ends of the line, with vertical lines connecting them to the ends of the horizontal line.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 80 is written above the tick mark. The number 2 is written below the line at the left and right ends of the line, with vertical lines connecting them to the ends of the horizontal line.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 60 is written above the tick mark. The number 2 is written below the line at the left and right ends of the line, with vertical lines connecting them to the ends of the horizontal line.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 100 is written above the tick mark. The number 2 is written below the line at the left and right ends of the line, with vertical lines connecting them to the ends of the horizontal line.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 100 is written above the tick mark. The number 2 is written below the line at the left and right ends of the line, with vertical lines connecting them to the ends of the horizontal line.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the center. The number 20 is written above the tick mark. The number 2 is written below the line at the left and right ends of the line, with vertical lines connecting them to the ends of the horizontal line.

$$60 : 2 = 30$$

A number line diagram showing 60 divided into two equal parts of 30 each.

$$100 : 2 =$$

A number line diagram showing 100 divided into two equal parts.

$$80 : 2 =$$

A number line diagram showing 80 divided into two equal parts.

$$100 : 2 =$$

A number line diagram showing 100 divided into two equal parts.

$$20 : 2 =$$

A number line diagram showing 20 divided into two equal parts.

$$60 : 2 =$$

A number line diagram showing 60 divided into two equal parts.

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '60' is written above the line, and '30' is written below the line at both ends. A bracket spans the entire length of the line, with the equation $60 : 2 = 30$ written above it.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '100' is written above the line, and '2' is written below the line at the tick mark. A bracket spans the entire length of the line, with the equation $100 : 2 =$ written above it.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '20' is written above the line, and '2' is written below the line at the tick mark. A bracket spans the entire length of the line, with the equation $20 : 2 =$ written above it.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '60' is written above the line, and '2' is written below the line at the tick mark. A bracket spans the entire length of the line, with the equation $60 : 2 =$ written above it.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '80' is written above the line, and '2' is written below the line at the tick mark. A bracket spans the entire length of the line, with the equation $80 : 2 =$ written above it.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number '100' is written above the line, and '2' is written below the line at the tick mark. A bracket spans the entire length of the line, with the equation $100 : 2 =$ written above it.

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the tick mark. The number 30 is written below the line at the left and right ends of the line, indicating that the bar is divided into two equal parts of 30 each.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the tick mark. The number 2 is written below the line at the left and right ends of the line, indicating that the bar is divided into two equal parts.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 80 is written above the tick mark. The number 2 is written below the line at the left and right ends of the line, indicating that the bar is divided into two equal parts.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the tick mark. The number 2 is written below the line at the left and right ends of the line, indicating that the bar is divided into two equal parts.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the tick mark. The number 2 is written below the line at the left and right ends of the line, indicating that the bar is divided into two equal parts.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 20 is written above the tick mark. The number 2 is written below the line at the left and right ends of the line, indicating that the bar is divided into two equal parts.

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the tick mark. The number 30 is written below the line at both ends, with vertical lines connecting them to the ends of the horizontal line.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 80 is written above the tick mark. The number 2 is written below the line at the tick mark. The number = is written below the line at the right end. Vertical lines connect the tick mark to the ends of the horizontal line.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the tick mark. The number 2 is written below the line at the tick mark. The number = is written below the line at the right end. Vertical lines connect the tick mark to the ends of the horizontal line.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the tick mark. The number 2 is written below the line at the tick mark. The number = is written below the line at the right end. Vertical lines connect the tick mark to the ends of the horizontal line.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 20 is written above the tick mark. The number 2 is written below the line at the tick mark. The number = is written below the line at the right end. Vertical lines connect the tick mark to the ends of the horizontal line.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the tick mark. The number 2 is written below the line at the tick mark. The number = is written below the line at the right end. Vertical lines connect the tick mark to the ends of the horizontal line.

$$60 : 2 = 30$$

A number line diagram showing 60 divided into two equal parts of 30 each.

$$60 : 2 =$$

A number line diagram showing 60 divided into two equal parts.

$$100 : 2 =$$

A number line diagram showing 100 divided into two equal parts.

$$20 : 2 =$$

A number line diagram showing 20 divided into two equal parts.

$$100 : 2 =$$

A number line diagram showing 100 divided into two equal parts.

$$80 : 2 =$$

A number line diagram showing 80 divided into two equal parts.

$$60 : 2 = 30$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the line, and the number 2 is written above the tick mark. The number 30 is written below the line at both ends of the line.

$$20 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 20 is written above the line, and the number 2 is written above the tick mark. The line is open at both ends.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the line, and the number 2 is written above the tick mark. The line is open at both ends.

$$60 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 60 is written above the line, and the number 2 is written above the tick mark. The line is open at both ends.

$$80 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 80 is written above the line, and the number 2 is written above the tick mark. The line is open at both ends.

$$100 : 2 =$$

A number line diagram showing a horizontal line with a vertical tick mark in the middle. The number 100 is written above the line, and the number 2 is written above the tick mark. The line is open at both ends.
